

Major Airframe Manufacturer

APPLICATION

General consumable MRO items and returnable calibrated instruments managed with SupplyAgents and SupplyBays and SupplyLockers

OBJECTIVES

Provide 24/7 tool availability in a tool crib in a remote area on a one-shift staffing budget

INITIAL STATE

Tool crib was staffed on one shift and locked on others with limited access

Productivity was lost on off-shifts to unlock crib to access tools

Many off-shift transactions were not properly recorded which caused inventory data to be inaccurate

CURRENT STATE

Tool crib is unlocked, fully automated and open 24/7

SupplyPro Point-of-Use system manages consumable tools and durable tools as well as calibrated inspection tools

Replenishment orders are sent to a supplier for restocking

Costs are equivalent to the original single-shift budget

Crib attendant has been reassigned to another more active crib

Attendant performs more value-added duties now

SupplyPro technology can be applied in many different ways to accomplish a particular client's objectives. This Application Profile is part of a series on real-world application successes that have been implemented with our clients.
