Iafrate Machine Works

By Bruno Iafrate - Owner

About Iafrate Machine Works

Iafrate Machine Works Limited (IMW) is a custom jobbing, machining, tool and die and fabricating facility located in Southern Ontario. The company has grown through seven expansions to the present 60,000 square foot facility.

Established in 1976, IMW offers a full range of custom machining and production, engineering and fabrication and is also a leader in its ability to provide manufactured proto-types. Many innovative products and machining processes, designed specifically to customer requirements, have made IMW a leader in manufacturing industries including: Automotive (OEM), oil and gas, aerospace, chemical, abrasive and pulp and paper.

Highly skilled personnel assist our customers in developing quality design machining solutions with a firm commitment to improving our customer's **competitive edge**. By analyzing designs and specifications, our team focus is on establishing manufacturing processes to be applied to the machining of components of various size, configuration and complexity.

Incorporating SupplyPro Solutions

An integral component of our passed successes has been the purchase, implementation and continued partnership we have held with our tooling suppliers and especially the utilization of our "SupplyPro" Automated Point-of-Use Dispensing System and Solutions.

We acquired our original system in 2004 and have reaped incredible returns from our initial investment ever since. The system has proven incredibly functional and reliable over the past five years. Continuous software upgrades and support have ensured our captured data and tool dispensing to be precise and accurate.

The system collects and manages all device transactions in addition to all activity related to automated reporting and ordering, inventory control, accurate cost allocation and aided in our efforts to strive for "Continuous Improvements".

The system is interfaced with our Enterprise Resource Planning software and is strategically placed throughout the plant floor for "Point-of-Use" tooling distribution. Utilizing common bar-coded identification badges, a combination of dispensing hardware of materials and software for managing dispense and replenishment, assists our employees and offers opportunities to reduce expenses, properly allocate costs, improve operator productivity, and lower inventory levels.

In today's extremely competitive environment, every opportunity for cost containment and improved productivity are essential. SupplyPro systems have allowed us to "Manage the Job" and not only the "Costs".

About SupplyPro

SupplyPro delivers the technology and support you need to implement Point-of-Use automation and control programs with confidence to improve productivity and drive costs out of your business. Our consultative services provide all of the support and project management expertise you need to make your implementation a success. We stand by you every step of the way. **For more information visit www.supplypro.com or call 1.858.587.6502 or 1.513.671.4933 x. 107.**
