

SupplyPort

The Industry's Leading Web-based Data Management Engine

SupplyPort

Industry-Leading Data Management Backbone

SupplyPort sets SupplyPro's offering apart from all other materials management solutions. It is the intelligence engine that drives our devices, links with distributor information, integrates with customer-based ERP systems and enables access to real-time information and administration on any web-enabled device.

SupplyPort is the Differentiator

With SupplyPort you gain:

- Comprehensive process automation with location-specific business rules and replenishment
- Enterprise-wide visibility and analytics for LEAN process improvement
- Single point of control for usage and access by location, employee and/or device

Plug and Go!

It's simple to get started. SupplyPro's implementation combines our devices with SupplyPort's data management and staffing for implementation and on-call support services for a full service solution. Find out more today!

Take Full Advantage of Your Inventory Data with SupplyPort's Easy to Use Reports

SupplyPort gives management the opportunity to look at inventory data like never before. Decisions can now be made based upon real-time, accurate information.

- Secure transaction capture in the event of an Internet failure using "store forward" technology
- Servers hosted by AT&T at their regional operations center
- Plug and Go technology!

SupplyPort collects and processes transaction data, controls inventory levels and manages automatic replenishment.

SupplyPort empowers the management of your Point-of-Use program by enabling you to:

- Manage your data
- Provide secure user access to materials
- Check inventory levels
- Manage replenishment and reordering according to custom parameters and business rules
- Schedule reports for automatic emailing to key personnel
- See item-level, plant-level and enterprise-level data views
- Optimize inventory turns
- Easily extract data
- Eliminate unaccounted tool loss

Information Where You Need It

Traditional and wireless connectivity options move data easily and securely from device to SupplyPort via the Internet. It also creates seamless data flows to existing information systems.

- Flat file interface capabilities
- Easy interface with existing systems
- ERP and procurement systems automatically receive transaction information
- Send automatic updates to SupplyPort for changes to work orders, job numbers, department changes, etc.

Industry-Leading Integration Expertise

- Easily supports import and export interfaces
- Leader in scoping interface requirements

Manage Inventory Levels with Accurate, Timely Reports

With SupplyPort you have the visibility to effectively manage consumable and reusable inventory with more than 100 different standard reports in drill-down format which can be accessed anytime, anywhere. Operations managers, as well as procurement and finance departments, can set up report emails on a regular schedule for better decision-making.

Replenishment Management

SupplyPro's automated replenishment configuration provides control and flexibility to accommodate whatever restock requirements may exist per vendor, product type and even machine.

Part #	Product Name	Total # of Orders	Qty Ordered	Amount Ordered	Restock Qty	Restock Amount
3	TAPE, PLASTIC, GREEN	7	1	\$0.00 2		\$0.00
4	DRILL BITS, #00	3	5	\$12.50 5		\$12.50
5	GRINDING DISCS, LARGE	1	5	\$0.00 9		\$0.00
6	SAFETY GLASSES, ENCON	2	10	\$100.00 30		\$100.00
7	TAPE, ELECTRIC	3	15	\$0.00 18		\$0.00

Financial Accountability

Full visibility with a few clicks to all historical refill orders sent from SupplyPro. Managers and suppliers can see summary views, and drill into a product to see individual order dates and quantities.

Order Date	Order Qty	Order Amount
6/23/2006 6:53:51 AM	5	\$50.00
6/23/2006 10:00:17 AM	5	\$50.00

SupplyPro Fail-Safe Technology

SupplyPro Enlists “Store Forward” Technology and Secure, World-Class Facilities to Ensure Your Data’s Protection and Availability

SupplyPro understands that connectivity and real-time information is paramount to effective materials management.

Store Forward

Our Fail-Safe technology includes the ability to store transaction data at the device in the event of an Internet service interruption. Once service is restored all transactions are uploaded to SupplyPort.

World Class Data Backup and Protection.

We also realize the critical need for peace of mind regarding the protection of your data. In response we have taken great measures to ensure data security and availability. SupplyPro’s SupplyPort is co-located at the AT&T Internet Data Center in Irvine, CA. The state of the art facility has complete (N+1) **redundancy for all systems to ensure “near-zero” downtime to the SupplyPort.**

Reliable Access to Your Data

AT&T’s strategic partnership with CISCO Systems has enabled them to design a network for the customer with maximum uptime and complete redundancy with no single points of failure in the core network.

- Fully meshed and redundant network that is powered by flagship CISCO products
- Dual entrance and dual path OC-48 access to diverse AT&T Internet MegaPOPs
- Dedicated or burst-able bandwidth solutions along with various speed options
- Built in power redundancy to support continuous availability of the SupplyPort

In the Event of an Emergency....

In the unlikely event that data recovery is required, SupplyPro utilizes an online system to provide recovery services from multiple back-up sources. This provides us with the ability to retrieve data on a same day basis for our customers versus the delays associated with traditional tape back-up storage systems.

SupplyPro has engaged EVault, the leading provider of secure, online backup and recovery services. The data is encrypted and backed up to a pair of mirrored servers – located at SupplyPro’s headquarters and at the secure data center on a daily basis.

Stored safely off-site, the data is professionally managed and available online at all times for immediate recovery. From a single management console, EVault’s InfoStage application enables us to easily configure and automatically run dual backup tasks to storage vaults in multiple locations, ensuring that data is always safe and secure.

SupplyPro - Simplicity that Delivers

SupplyPro, Inc. is the premier provider of Point-of-Use (POU) inventory management solutions with over 4,500 installations in 39 countries. Our solutions bring proven simplification to the distribution and management of MROP, safety and tooling supplies at the work cell. Easily adaptable to customers’ business environments to deliver the industry’s highest return on investment. Industry-leading capability to interface to existing ERP and supply chain systems. **For more information, visit www.supplypro.com, email info@supplypro.com or call 1.858.587.6502 or 1.513.671.4933 x. 107.**
