

# Fail-Safe Technology

Is Your Vending Strategy SAFE?

## Point-of-Use Dispensing Solutions are Fail-Safe with SupplyPro

In 24x7x365 production environments ensuring employee access to materials is critical and having fail-safe dispensing and accountability for every transaction is key. Don't let a network failure stop your plant operations.

### SupplyPro's Fail-Safe Technology ensures:

- Secure transaction capture in the event of a network failure using "store forward" technology
- Items selected in error can be easily returned
- Data servers are hosted by AT&T at their regional operations center
- 99.99+% uptime for SupplyPort data management

### Make Sure Your Dispensing is Engineered to be Fail-Safe!

SupplyPro's solutions have been engineered with security and uptime at its core. SupplyPro enlists "Store Forward" technology coupled with secure, world-class AT&T facilities to ensure your data's protection and availability.

### Can You Store Forward?

Our Fail-Safe technology includes the ability to store transaction data at the device in the event of a network service interruption. Once service is restored all transactions are uploaded to SupplyPort for full reporting and ordering availability.
