

Expensive Tooling Available for Anyone to Take
No Accountability for Usage
No Proper Allocation of Tooling Costs
Work Stoppage from Missing Mission Critical Tools

Cutting Tools
The Perfect Application for a Vending Strategy

Supply
Pro
simplicity that delivers

How much are you losing on expensive carbide, diamond-tip cutting tools? Get Accountability NOW!

SupplyPro's Vending Solutions for Cutting Tools Provide:

- Reduced tooling consumption on average 20-40%
- Absolute Control™ of expensive tooling
- 100% Accountability for usage
- 24x7x365 Approved access for specific users
- Accurately allocate tool costs to the right job, machine, work, etc.
- Mission critical tool access prevents work stoppage
- Reporting metrics to identify abuse and waste
- Increased productivity and machine-center output with cell-based Point-of-Use devices
- Line-side access to materials with SmartDrawer shop floor cabinets
- Drawer-by-drawer control and expansion as your needs increase

In the manufacturing environment few indirect materials have as much cost associated with it as cutting tools... in some cases costing thousands of dollars EACH. This is a huge expense that is either lying unguarded on the manufacturing floor for anyone to take, or locked in a tool crib with limited access, especially for 2nd and 3rd shifts.

How do you control access and still provide the tooling when it is needed for the right job? With Point-of-Use solutions from SupplyPro.

SupplyPro has long been a leader in developing solutions tailored specifically for cutting tool applications. From helix machines to our patented SmartDrawer and SmartDrawer Box Dispenser solutions, a wide variety of capacities can be accommodated in an Absolute Control® environment.

Application Flexibility

- Take/Return
- Ability to force dispense of regrinds before new tooling
- Restrict part number access and quantity
- Forced return feature

Cutting Tools Typically Controlled by SupplyPro

- Carbide Inserts
- Endmills
- Burrs
- Reamers
- Drillbits
- Taps
- Allen wrenches
- Rivets, and MORE!

SupplyPro's Intelligent Materials Management Solution

Choose the right machine for the application and environment to bring control and accountability along with ACCESS to mission critical supplies. SupplyPro devices can be used separately or combined to bring you the most efficient, cost-effective and easy-to-use solutions.

SmartDrawer™

A Low-Cost Solution to Control, Track and Manage Inventories

SmartDrawer technology is extremely versatile and configurable, allowing by compartment individual level of access control and accountability for each application. Manage items under absolute control for single-item dispense and return or high-density part number level management.

SmartDrawer Box Dispenser

Greatest Density Solution for Costly Tooling in a Small Footprint

SmartDrawer Box Dispenser(SBD) is a multipurpose solution with 108 discrete compartments to manage mission critical inserts and everyday small tooling. Solution can be mixed with other SupplyPro SmartDrawer offerings.

SupplyBay

Absolute Control® in a Rugged, Industrialized Vending System

The most versatile, industrial-grade vending system available. Performance engineered for harsh environments, designed to handle high-volume throughput and provide trouble-free dispensing for a wide range of cutting tools.

Standard cutting tool configurations available!

Make Sure Your Vending Strategy Makes Sense

Today, every manufacturing facility has great control over \$.25 potato chips & snacks while leaving cutting tools, PPE, and MRO supplies, tools, and other assets scattered throughout the manufacturing plant in unlocked cabinets, bins, toolboxes and unmanned storerooms. What is this costing you? Start playing with chips that really matter!
